- Video Support
  - 480i, 480p, 720p, 1080i, 1080p
- MoCA support

# TiVo Preview: Features and Benefits

**HD interface:** TiVo Preview's visually stunning HD interface gives you the tools to search, explore, browse and discover like never before—on both TV and the web. It's now faster, easier and more intuitive than ever to find more of what you love. And a new multi-column format delivers more information per screen.

**Advanced Set-Top-Box:** Unified search. Discovery Bar. Browse. Recommendations. WishList Searches. Authored Collections. Integrated Broadband Content, Deployed in either standalone or multi-room configuration with TiVo Premiere or TiVo Premiere Q, TiVo Preview leverages TiVo's award winning UI to bring the best of your services to any room in your customer's home.

**Search TV and VOD:** Search millions of titles and multiple sources and find exactly what your customers want to watch. Search, discover and explore everything that's available all in one place. Get your movie and TV shows highlighted first in the search results before purchasing.

**Browse by TV and movie posters:** The TiVo Browse feature is the perfect way to make sense of all the great content coming into your customer's home. Not sure what to watch? The visual poster-browse display delivers information at a glance. Looking for a good movie? Top Picks has all the most popular content from across your content library.

**Find shows based on topical Collections:** The TiVo Collections feature highlights the best that television and the web have to offer—all grouped into fresh, fun, up-to-date categories. Explore topical collections, event-driven collections, seasonal collections and groups of shows related to something new, interesting or popular. You can even author your own set of collections to highlight your latest On Demand releases or the upcoming Pay-Per-View events.

**See similar shows in the Discovery Bar:** The Discovery Bar is a graphic lineup of content that appears across the top of Preview's stunning HD menus. This display gives your customer helpful recommendations for movies and TV shows from your On Demand catalog that are similar to ones they already enjoy, as well as titles that are currently popular in the TiVo community.

**Watch recordings on your DVR:** With both a Premiere/Premiere Q and Preview box connected to your customer's home network, they can easily access recordings stored on the Premiere, and stream them for viewing via the Preview. They can pause, rewind and fast forward streaming programs, and even delete recordings. The option to schedule recordings from the Preview is coming soon. The ability to pause and rewind TV is only available via the Premiere.

**Access streaming music services:** Whether your customers are in the mood for classical, hip-hop or anything in between, it's easy to access millions of songs through TiVo Preview. With Pandora, they can create their own radio stations based on a favorite song or artist. Or use their Rhapsody® account to stream the music they love. They can even listen to hundreds of FREE music channels with Live365. (Additional fees may apply from third-party content providers.)

**Listen to your PC/Mac music library:** Your customers no longer need to access their computer's personal music library through their computer's speakers or headphones. With TiVo Desktop software, it's simple to stream the tunes they love the most on their TV or home entertainment system. Rock on.

**View your photos and home videos on the big screen:** TiVo Preview lets your customers display their personal photo library and home videos from their PC or Mac on the biggest screen in the house. They'll be larger than life. (TiVo Desktop software required.)

\*TiVo boxes must be connected to your home network to perform multi-room streaming.
