PARENTAL CONTROLS

MY PARENTAL CONTROLS ARE NOT WORKING.

- For Parental Controls to work, they must be on. When you enter your password to watch a show that violates Parental Controls, they are temporarily turned off. You can re-enable them on the Parental Controls screen (from the TiVo Central screen, select 'Settings & Messages,' then 'Parental Controls'), or by putting your TiVo box in Standby mode and then taking it out of Standby. (Put your TiVo box in Standby mode by selecting 'Settings & Messages,' then 'Standby.' To return to normal mode from Standby, press either the TiVo button - at the top of your remote control - or the LIVE TV button - on the right of the TiVo button.)
