¹ Streaming within the home requires a separately purchased TiVo Mini (with service included) for each TV. Your TiVo DVR works optimally with up to four TiVo Minis, and potentially with up to ten TiVo Minis. A multi-network adapter (sold separately) may be required.

² Broadband Internet connection is required to access and receive streaming content. Availability of third-party content from streaming sources is subject to change, and certain third-party fees may apply. For example, Netflix unlimited streaming membership is required (and sold separately) to access Netflix content, and Amazon Prime membership is required (and sold separately) to access Amazon Prime Instant Video content.
