

TIVO

BOLT[®]

UNIFIED ENTERTAINMENT SYSTEM

Setup + Product Features

Step 1: Activate your TiVo Service

If you bought your TiVo BOLT at a retail location such as Best Buy or Amazon, activate your service at www.tivo.com/activate or by calling TiVo Customer Support at 1-877-367-8486. If you purchased your TiVo BOLT from *tivo.com*, your TiVo BOLT is likely pre-activated and ready for set up, and you can skip this step.

To activate your service, you'll need your TiVo Service Number (TSN). Write it here for reference:

Step 2: Order a CableCARD™ (cable users only)

If you use cable, your TiVo BOLT needs a CableCARD decoder to receive your cable programming. Pick up a multi-stream CableCARD (M-CARD) at your nearest cable service center, or order one from your cable company.

Don't wait for your CableCARD to set up your TiVo BOLT. You'll be able to watch non-encrypted TV channels and streaming apps (like Netflix and Amazon Prime¹) until your CableCARD arrives.

If you want to learn more about CableCARD setup, visit the Welcome Center and review "Setup and connect" at www.tivo.com/welcome.

If you receive over-the-air programming from an HD antenna, skip this step.

CableCARD™ Activation Support

When you install your CableCARD, you'll be prompted to call your cable provider to activate or pair your CableCARD. Phone numbers for the most commonly-used cable providers are listed below.

Note: Some cable companies require additional equipment, like digital tuning adapters. Be sure to ask your cable provider if additional accessories are required to complete your setup.

Charter Communications – Support

1-888-438-2427

Comcast/XFINITY – CableCARD Activation

Step 3: Connect your TiVo BOLT

1. CableCARD

For cable TV, insert a multi-stream CableCARD (M-CARD) decoder into the slot on the underside of the TiVo BOLT. For OTA programming, skip this step.

If you don't yet have an M-CARD, continue with installation and order one from your cable company.

2. Coax or Antenna

For cable TV, connect a coax cable.

or

For over-the-air programming, connect an HD antenna (sold separately).

3. HDMI®

Connect the included 4K-ready HDMI cable.
Note: If you use a third-party cable, always use one that is 4K-ready.

4. Home Network

Wireless—Your TiVo BOLT has built-in wireless capabilities.

Note: Wireless is not supported when connecting to a TiVo® Mini.

or

Ethernet—Connect your Ethernet cable (recommended setup).

Note: Please make sure the Ethernet cable is Cat5e. For more networking options, visit www.tivo.com/howto.

5. Power

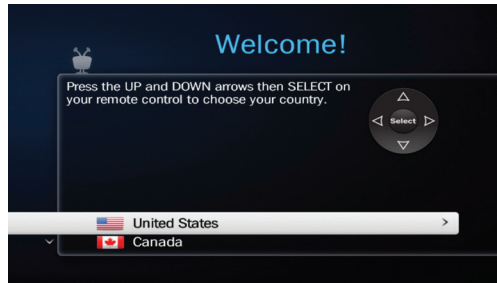

Plug in the power cord.

Step 4: Complete Guided Setup

Turn on your TV. When you see the TiVo Welcome screen, you're ready to begin Guided Setup. Just follow the on-screen instructions.

Complete Guided Setup even if you don't yet have a CableCARD installed in your TiVo BOLT.

If you don't see the Welcome screen, use the Input, Source, or TV/Video button on your TV remote to select the correct video input for the TiVo BOLT.

Step 5: Get the Guide!

To learn how to use the great features your TiVo BOLT has to offer, download the Viewer's Guide from tivo.com/howto.

Enjoy your TiVo BOLT.
